NMR

Need zero downtime? Nexus NMR (N-Modular Redundancy) eliminates single points of failure by combining multiple Edge Max or Edge Max+ servers with dual redundant firewalls into one fully resilient system. Full enterprise IT, cybersecurity and crew services with built-in redundancy for mission-critical operations.

WHAT EVERY ZWANA INCLUDES

Every Zwana is delivered as a complete, rack-mounted solution including managed switch, next-generation WatchGuard firewall, UPS and cabling, configured, tested and ready to install.

Any satellite, any GSM

Fully interoperable with any satellite or GSM provider. We handle the configuration, deployment and ongoing management.

Zwana Software Suite

Crew Internet Café, VoIP, telemetry and data analytics, built in and ready to use, on every Zwana model.

abela Pulse

A simple, intuitive dashboard giving captains real-time visibility into connectivity, IT systems and cyber security at sea.
